Proposed Technology Solution For Mobile App:

Although above mention objectives, goals, and recommendations are simple in description; these initiatives can be very difficult to achieve without proper planning, project management, user experience design, exceptional programming and information architecture skills.

We feel that it is critical to engage in “*out of the box*” tactics that drive user loyalty and enhance the overall experience of the site for a broader audience.

Based on your requirements I would like to suggest Your ERP will be in React JS and Node JS And Mobile Application (Android and IOS) Will be in Flutter.

Technologies:

- 1) Web Application (React JS and Node JS)
- 2) Mobile Application (Flutter)

Design Technologies: Adobe Photoshop and Wireframe Maker

Database :- MySql Server
